

Scale with UPS® Fulfillment

Scaling a company is an endless process. Fortunately, UPS has the technology to make your life easier. Businesses can tap into our warehousing, fulfillment and shipping solutions, so you can focus on the things that will have a greater impact to your bottom line.

Scale with our UPS fulfillment program.

Late cutoff times

Same day fulfillment to impact consumer ratings/reviews and sales

Growth Advisor

Expertise in fulfillment

Distributed inventory

Store inventory close to the consumer for fast and cost effective delivery, while utilizing proximity routing logic

Simple returns management

Multiple returns options to get your orders back into the supply chain

Branded delivery experience

Turn your packages into a promotional opportunity on every shipment

It's time to start outsourcing.

When you started your business, inventory and shipping was simple. You used an empty garage, and everybody chipped in to prepare the packages for shipping. But now you've grown to the point where there is no longer enough space. Suddenly security and locating merchandise are top priority, and as the orders get bigger, you're so busy dealing with order fulfillment that you don't have time to focus on growth. This program is ideal for businesses in:

- Apparel, Shoes or Accessories
- Consumer electronics'
- Home & Garden
- Sports & Fitness
- Jewelry & Watches
- Toys & Games
- Mobile Phones & Accessories
- Office Equipment & Supplies
- Automotive

Get the support you need and take advantage of these benefits.

- No long term commitment
- Use your existing UPS shipping rates
- For new customers, receive competitive shipping rates
- Save on shipping costs by fulfilling from Toronto or Calgary
- No Minimums
- Easy to follow fulfillment pricing
- Shipping and fulfillment fees on one invoice
- No receiving or stocking fees

Quantifying the cost of not differentiating your business.

When you bring improved efficiency to your operation, you may see widespread benefits. With important data captured in a single repository, as well as data collection and processing automated to reduce the likelihood of human error, you can make decisions based on accurate and timely information instead of “going with the flow” or reacting to problems as they arise.
